### WORK EXPERIENCE

#### DO YOUR THNG [Software Developer] 01/02/2022 - Present

##### Project 1: Brand Panel

**Project Description:** Do your Thng is an influencers app that helps creators make money and helps brands to find the right influencer.

**Tech Stack :** React.js , Javascript, Redux, Bootstrap, Html, CSS

##### Roles And Responsibilities:

- Designed dynamic and browser compatible pages using React.js.
- Integrated Restful APIs and managed data flow using state management libraries like Redux.
- Have faced challenges such as enhancing project stability than before.
- ensuring seamless campaign management from start to finish.

##### Project 2: DYT STUDIO

**Project Description:** DYT Studio is a web app that provides workshops for the creators to learn and grow.

**Tech Stack:** React.js, Redux, React Router, Tailwind CSS, Framer Motion.

##### Roles And Responsibilities:

- Designed responsive layouts, integrated API's and delivered an end-to-end project on time.
- Overcome challenges, maintained clean code and optimized the application.

##### Project 3: DYT CLUB

**Project Description:** It is an Android and IOS app for creators to connect with another creator and grow together.

**Tech Stack:** React-Native, Redux, Expo-Router, Tailwind CSS, Strip.

##### Roles And Responsibilities:

- Developed cross-platform Android and iOS applications using React Native, ensuring production readiness and optimal performance.
- Enhanced user experience and engagement by designing and implementing responsive layouts for various devices, optimizing accessibility and usability.
- Implemented key features such as dark mode and customizable light themes to cater to diverse user preferences, enhancing overall app flexibility.
- Spearheaded authentication functionalities utilizing JWT token, ensuring secure user access and data protection.
- Successfully integrated payment mechanisms using Stripe, facilitating seamless transactions and enhancing the app's monetization capabilities.
